

Easi-Serv's patio glazing systems allows for complete flexibility in the layout of patio screens since the glass can be installed at any angle. Completely weatherproof ensuring low maintenance costs, this patio surround system is easy and economical to install. The posts are available in a variety of lengths and finishes.

Features

Typical Layout

- Eight glass pockets with snap-in covers allows for one post design to be used for multiple configurations.
- Posts designed to hold 12mm toughened safety glass without requiring, top or bottom support rails.
- Constructed from proprietary aluminium extrusions featuring continuous glass channels.
- Installed on steel stanchions wedge anchored to the foundations.
- Engineered to resist up to 25 psi pressure loads.
- In addition to glass, posts are strong enough to support gates, and can also be used as light or hanging basket standards.
- Supplied as standard in a black baked enamel finish, customised powder coated colours are readily available.

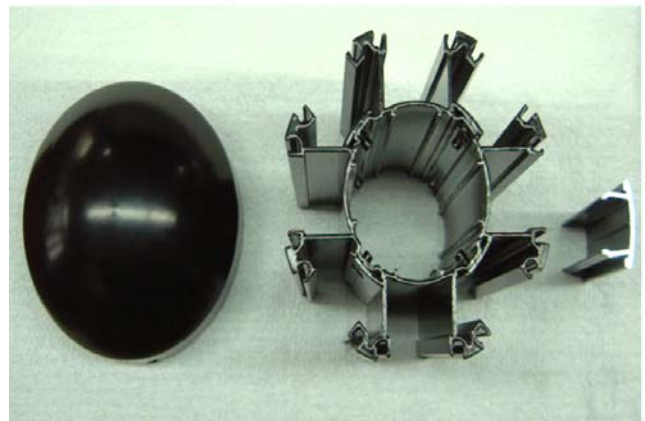

Standard Patio Glazing Post Specifications
