

Drive-Thru Windows—Side Sliding

First launched twenty-five years ago Easi-Serv drive-thru windows are easy to fit, have been designed to withstand winter cold and summer heat, and come with guaranteed weather protection. Available in a variety of styles and sizes these competitively priced windows are ideal for any drive-thru application.

CSP 100 / 200 Bump-out Single Side Slider

SS 100 / 200 / 300 Flush Single Side Slider

SB 200 Flush Double Side Slider

Features

- Bump-out and flush model options.
- All vertical windows have one fixed and one moving panel.
- Constructed using slimline extrusions to give improved sitelines.
- Standard finishes are white Syntha Pulvin, satin silver or bronze anodised aluminium with custom power coating or wet coat painting available in any colour.
- Moving panels are top hung with industry proven sealed bearings and run on a UHMW guide track.
- Double mohair brush seals and interlocking jambs on all moving panel edges.
- Panels glazed with 24mm sealed units with toughened safety glass.
- Security locks to prevent unauthorised opening.
- All windows are available in either manual or automatic operation.

Automatic

- Automatic opening controlled by optical sensors.
- Three position logic lock provides for:
 - normal operation—automatic opening
 - peak period operation—locked open
 - night usage—locked shut.
- Normal operation opening features a security override, which limits the window opening to twelve inches.

Manual

- Large easy to grab handles and Adams-Rite locking hardware.
- Carefully balanced to allow for one finger opening.

CSP 100 (Automatic) / CSP 200 (Manual) Single Side Slide Window

- Classic style bump-out window.
- 1220m x 1450mm.
- One fixed and one moving panel in either XO or OX configuration.
- Drop down stainless steel sill.
- Insulated inclined head section with an integral rain drip.
- Optional fan driven heater installed in the hood.
- Large interior counter space.
- Provides 180 degree visibility.

SS 100 (Automatic) / SS 200 (Manual) / SS 300 (Self-Closing) Single Slide Window

- Flush mounted window.
- 1270mm x 965mm.
- One fixed and one moving panel in either XO or OX configuration.
- Sloped thermally broken sill and a 13mm moving panel guide track that doubles as a rain block.
- Optional backlit greeting panel built into the sill that can be fitted with interchangeable message boards.

SB 200 (Manual) Double Side Slide Window

- Flush mounted window.
- 1360mm x 955mm.
- Two fixed and two moving panels in XO-OX configuration.
- Sloped thermally broken sill and a 13mm moving panel guide track that doubles as a rain block.
